

The Tomato Dream Team

Four dimensions of goodness from our tomato

We extract all our fabulous food ingredients that contribute to bringing back the goodness of tomato in taste, color and texture, as well as the inherent goodness and nutritional edge to consumer food and drinks.

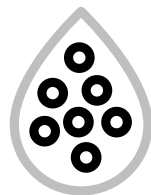

SANTE

A natural taste enhancer providing a combination of umami and kokumi taste impacts.

Clear Tomato Concentrate (CTC)

A tomato taste "add back" that provides smooth, balancing taste improvement to recipes.

LycoFibers

Naturally modify pulpiness, viscosity and mouthfeel in sauces, soups and ready meal products.

Dry Tomato Pulp (DTP)

A provider of fresh consistent color with great smooth authentic texture impact.

Bringing it all together

With the combined impact of each of these ingredients and processes, we can improve color, taste, texture, viscosity and yield levels; all with clean label ingredient declarations such as "tomato concentrate" and "crushed tomatoes".
